### INGREDIENTS DESCRIPTION

Active ingredients of 1 composition: Ammonium Thioglycolate

### HOW TO USE

Step 1 - LIFT, the lifting cream is applied for 4-10 minutes, depending on the density of the eyelashes, with a distance from the root of 0.5-2 mm, and for 30-60% of the curler height.

After not using the product for a longer time, it is recommended to throw away the first drop of the product.

Processing time for the treatment:

Thin and weak eyelashes 4-5 min

Medium eyelashes 6-7 min

Thick eyelashes 8-9 min

Very thick eyelashes 10 min

After the desired time, clean the eyelashes with dry cotton swabs with a movement towards the tail.

The products can also be used for the brow lift treatment (eyebrow lamination).

The eyebrow processing time. Step 1 is held for 4 to 10 minutes, and you should watch for brow readiness. When they start combing in different directions, remove step 1.

The processing time Step is 7-8 minutes.
